

Call for Demonstrations

IEEE PES ISGT 2019 is a forum to discuss the latest issues, trends, and emerging and innovative technologies for grid modernization in the face of challenges of a rapidly changing environment resulting from the dramatic increase in deployments of renewable and Distributed Energy Resources (DERs) and the emergence of new business and operating concepts and services. This year, the PES would like to invite participants to submit a demonstration to be showcased during the conference. The demonstration must feature a live simulation and/or interactive piece to engage with conference participants. All submittals are expected to feature the latest and most innovative technologies for grid modernization to align with this years' theme.

Demonstrations can include (but are not limited to) the following topics:

1. Integration of Renewables
2. Smart Grid Software
3. Energy Storage
4. Microgrids
5. Electric Vehicles
6. Internet of Things (IoT)
7. Smart Cities

Application Criteria

Proposals must provide a clear description of the demonstration, the importance of the demonstration to the industry and any other relevant information. The proposals will be reviewed and selected based on relevance to the industry, academic merit, level of interaction and the ability to fit within the desired space. Each demonstration will be showcased on a 4 ft. x 6 ft. table. Space is limited.

Submission Guidelines

All proposals must follow the application format and can be submitted to 2019isgtdemos@ieee.org.

Proposals Due: October 31, 2018

Acceptance Notification: November 30, 2018

Please note this is meant to be a technology demonstration from researchers, labs and/or applications in the industry and should be treated as an alternate form of technical knowledge. This is not an avenue for product marketing.
