01 / Be Indispensable

The business of energy never stands still. Changes in technology, market demand, and regulations require today's utilities to constantly adapt. Since 1995, more energy industry customers have turned to OATI to provide solutions to their operational challenges. In fact, more than 95% of North American reliability organizations use our software and services, making OATI one of the most trusted names in the energy arena.

More than 1,100 dedicated staff – with more combined energy industry experience than any other software solutions provider and one of the industry – highest concentrations of PhDs – are working with single-minded focus to meet our customers – changing commercial and technical needs.

99.9% of OATI customers choose to extend their contracts for additional three to five years.

With Solutions stretching from the wholesale market to retail distribution, OATI is indispensable at every level of the energy industry.

02 / Connect Wholesale to Retail

OATI solutions connect – not only with one another, but with the external interfaces and legacy systems you count on every day; providing customers with OATI solutions that accept data from nearly any source and can output the reports you need at the click of a button.

We live in an increasingly networked world. It is essential to our teams within OATI that we provide customers with advanced technology solutions that provide a multitude of options, for you, by connecting generation, transmission, and demand-side resources to the wholesale energy market. At OATI, every step during the development of a product is modified to match customer needs. We want our solutions to provide utilities that optimize power supply management efforts, check costs, and fully harness the reliability,

03 / Build the Future

OATI is proud to present its best-in-class, NERC CIP- compliant Data Centers, with the strictest standards and security to ensure your data is secure and system reliability is high.

On a user-based level: OATI solutions give utilities complete and secure control of their resources, assets, and energy grid equipment. With the integration available, users are provided with the ability to manage a wide array of assets, using secure and easy web-based solutions.

To find out more about how your organization can use OATI solutions to solve complex problems, [visit OATI.com](http://OATI.com).

The OATI Private Cloud provides customers with robust redundancy reliability.

About OATI

OATI software solutions are proactively transforming the business of energy. For the last 25 years, OATI tools have been helping our customers manage the trading and transmission demands of the deregulated energy market.

Today, OATI offers more than 100 products stretching from wholesale to retail, including Energy Trading & Risk Management, Transmission, and Smart Grid Solutions to more than 2,200 loyal customers. Supporting all of these are OATI's state-of-the-art, NERC CIP-compliant Data Centers, built to Tier IV standards – the strictest in the industry – ensuring security and performance for the OATI industry-leading Software-as-a-Service (SaaS) delivery model and customers' critical cyber assets.

Every day, comprehensive OATI solutions are enhancing efficiency and improving operations for our customers. And with more combined energy industry experience than any other software solutions provider, utilities can trust that the complex challenges they face are getting the expert attention they deserve.

- « OATI is constantly innovating to help our customers make moving and delivering energy nearly effortless and extremely rewarding.
- « OATI has more combined energy industry experience than any other software solutions provider and one of the industry's highest concentration of PhDs.
